DETAILED ACTION

Applicants' arguments, filed 10/31/08, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 112 – 1st Paragraph – Written Description

Claim 18 was rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement based on the use of phrase "lipid-modified".

Applicants amended this claim to recite "an IRM conjugated directly to a lipid group."

Again, the specification fails to disclose a sufficient number of compounds to support the broader definition of compounds which may be IRM conjugated to lipid groups. (Note, "IRM conjugated to a lipid" would be acceptable).

Claim Rejections - 35 USC § 103

Claims 1-2, 16, 18-33 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Krieg et al (US Pregrant Pub 2003/0139364, see IDS dated 11/24/2004), in view of Uhrich (US 6,486,214, see IDS dated 7/28/2005).

Applicants assert neither prior art teach the administration of the depot formulation (i.e. delayed release) directly within the cancer tissue.

Krieg et al teaches the various forms of administration at paragraphs 222 and 395, which include parenteral and delayed release formulations. Further, with respect to the purpose of administration, paragraph 305 teaches administration of cancer vaccines to antigen presenting cells. Where the purpose of the administration is to administer the agents to cancer cells, i.e. the cells having antigen present, it would be obvious to one of ordinary skill in the art to administer a delayed release composition within the localized tissue in order to extend the effective administration period of the vaccines to the desired cells as suggested by the administration of the delayed release formulations and maximize exposure by administering directly to the cells having antigen present.

Conclusion

No claims allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
